

Classical Music Appreciation—Introductory

Class Outline

Bill Buffam, instructor
8-Jul-2006

This class emphasizes actually listening to music—we don't much delve into its structure and history. That said, we cover just enough of classical music structure to be able to understand and relate to it in a satisfying way. The works are chosen for their ready accessibility, and cover a fairly broad spectrum of musical styles. We'll be listening to complete works (as opposed to excerpts) without interruption, guided by program notes. I'll be marking off our progress as we listen to each piece, keeping you oriented to where we are in its structure.

We'll have a 5-10 minute class discussion of each piece, during which we'll all be able to learn from one another's questions and insights.

Here is the outline for the entire class:

week 1

*Barber, Adagio for Strings*¹
